

Ordering Musculoskeletal Procedures

Musculoskeletal (MSK) Surgery includes Hip, Knee, Shoulder, Spine Surgeries

When ordering MSK surgery procedures, the services will be identified as a bundle instead of a single procedure code to more efficiently facilitate the authorization process.

HealthHelp will authorize a surgery by utilizing the "Designated Primary Code". Any of the additional "Authorized Procedure Codes" can be submitted on the claim with the authorized surgery, unless otherwise noted below. Please refer to this Bundle ID when submitting your request.

The surgeon does not need to enter request for secondary or co-coded procedures.
